Profile

Software Engineer with a Master's degree in the field. I am passionate about technology and software development, always looking to learn and grow.

With 1+ years of experience in the field I am always looking forward for a new challenge and excited to contribute with all my skills and knowledge while I learn more about technologies and grow as an engineer.

Professional Experience

12/2024 – Present **Software Engineer**
Vienna, Austria VCE

09/2023 – 11/2023 **Android Development Intern**
Vienna, Austria Runtastic GmbH (adidas)

Education

Master Software Engineering
UAS Technikum Wien
2023 – 01/2024 | Vienna, Austria

Software Engineering
Instituto Tecnológico de Buenos Aires (ITBA)
2017 – 07/2024

Information Technology Analyst (associate's degree)
Instituto Tecnológico de Buenos Aires (ITBA)
2017 – 2022

Achievements

HackIt-BA Hackaton Finalist
2022
WebApp for financial education using Python, FastAPI, PostgreSQL and Vue

TechTrek Hackaton Finalist
2021

Outstanding Cambridge – ESSARP Learner: General Paper (international)
2016

Languages

English
Native/Cambridge IGCSE

Spanish
Native

Programming Languages / Frameworks

- Java, Python, C#, Javascript, Kotlin, Ruby, .NET
- PostgreSQL, MongoDB, Neo4J, ElasticSearch
- Android Development
- Spring and Hibernate familiarity, REST api, FastAPI
- Agile methodologies, SCRUM, Jira
- Angular, VueJS
- Unit testing with JUnit
- Google Cloud Platform and AWS familiarity
- Git, Docker, Maven
- CI/CD pipelines familiarity

Projects

Job Searching Website
Built a Single Page Application with a RESTful API using Java, Spring, Hibernate, PostgreSQL and Angular

Artificial Intelligence Projects
Developed simple AI projects: Simple and multilayered perceptron neural network. Deep learning autoencoder.

My own OS
Built a small OS with C and ASM

Social Events Website
Developed an API in Python using FastAPI that handles information in Neo4J and PostgreSQL databases. The information was displayed in a simple SPA made with Vue

Android app for Training
Developed an Android app in Java for people to train and make exercise

Steganography
Developed a program capable of encoding and decoding files inside bmp images by analyzing the LSB of each byte. Written in Java

Android app for Pet caring
Developed an Android app with Java and Firebase for people to take care of their pets

Course As Code (Master Thesis)
Developed a text-based tool in Python for teachers to create Moodle learning courses in an easier way.

Cron-like Automation System
Developed a software in C# that on a CRON schedule does a series of actions like download data, process it, filter it and send notifications. Very customizable.
